

MONKEY GRIP

SLIP CONTROL AGENT

Monkey Grip is a safe, non-toxic inert material that adds slip resistance to any concrete sealer. It is colorless and transparent so that it does not change the color or clarity of the coating.

Type:	Inert slip resistance agent
Toxicity:	Non-Toxic
VOCs:	None
Flammability:	Non- Flammable
Composition:	N/A
Color:	Colorless
Odor:	Odorless
Coverage:	Varies – See Sealer for Coverage Rates

NOTE: COVERAGE RATES MAY VARY DEPENDING ON POROSITY, TEXTURE, APPLICATION METHOD AND PRIOR SEALER APPLICATION. EXCESS BUILDUP SHOULD BE AVOIDED.

PRODUCT HIGHLIGHTS

- The clear transparent beads do not affect the color or transparency of a clear coat or a color seal coating.
- Inert: Monkey Grip is completely non-reactive. It will not affect the cure or drying time of acrylic or urethane coatings.
- Non-Toxic: Monkey Grip is harmless to the environment and to the operator. If spilled, it can be hosed off with no harmful effects.

PRODUCT USES

Monkey Grip can be wind rowed over a wet coating or added to the coating product before application to improve the safety factor of any coated concrete area where wet slipperiness can be a safety factor.
