

## LIQUID PROTECTION

### STEP 1: PREP

1. Prepare the floor with a Concrete DNA Double Sided Pad; 400 Grit.
  - a. Run the pad with plenty of water under a low-speed floor machine.
    - i. Add a dilution of Citra Pro to help clean the concrete
      1. Other strippers and cleaners are available for other situations such as glues and paints.
  - b. Squeegee water and remove from the floor with a wet/dry vac
  - c. Insure the floor is clean of dust and footprints by lightly mopping
  - d. Let the floor dry

### STEP 2:

1. Seal the floor with Concrete Floor Supply Ez-Shield
  - a. Ez-Shield can be applied with a microfiber flat mop
  - b. Sufficiently saturate the floor with Ez-Shield. Don't allow to puddle for more than 20-minutes
  - c. Allow the floor to sufficiently dry before use; typically, 24-Hour for light traffic

### STEP 3:

1. Utilize Ez-Clean for ongoing maintenance.
